FARMERS' BULLETIN No. 1401.—MANAGING CRANBERRY FIELDS:	
Control of insects and diseases	1
Resanding	2
Winter flooding	2
Summer and fall flooding	3
Flooding and frost protection	3
Weather forecasting	5
Fertilizers	5
Weeding	6
Cleaning ditches and upland	15
Pruning	16
Mowing and burning	16
Duration of a cranberry field	17
Seasonal operations in cranberry fields	17
FARMERS' BULLETIN No. 1402.—CRANBERRY HARVESTING AND HANDLING:	
Importance of careful picking, handling, and packing in relation to marketing	1
Harvesting	2
Methods of harvesting	3
Yields, costs, and returns	11
Handling and storing	12
Grading, sorting, and packing	17
Marketing	23
Cooperative organizations	26
FARMERS' BULLETIN No. 1403.—DEWBERRY GROWING:	
History of the dewberry	1
Site and location of a plantation	2
Soils	3
Preparation of the soil	3
Planting	3
Intercrops	4
Cultivation	4
Cover crops	5
Fertilizers	6
Systems of training and pruning	7
Winter protection	11
Harvesting	12
Yields	13
Diseases and insects	13
Propagation	14
Duration of the plantation	15
Pollination	15
Varieties	16
Hybrids and related forms	17
Summary	17
FARMERS' BULLETIN No. 1404.—PUMPING FROM WELLS FOR IRRIGATION:	
Introduction	1
Summary	2
Quality of the water	2
Water supply	2
The pumping lift	3
Location of the well	4
The well contract	4
Well casing	5
The open-bottom well	9

FARMERS' BULLETIN No. 1404.—PUMPING FROM WELLS FOR IRRIGATION—Continued. Page
Well development and testing 9
Determination of draw down 12
Battery of wells 13
Pumps 14
Selection, installation, and operation of pumps 19
Power unit 20
Cost of pumping installation 24
FARMERS' BULLETIN No. 1405.—THE WINDBREAK AS A FARM ASSET:
Windbreaks on the prairies 3
What is a windbreak? 3
How a windbreak protects 3
Checking wind movement 3
Reducing evaporation 5
Effect on temperature 7
Effect of the windbreak on yield of crops 9
Where and what to plant 11
Ground space necessary 13
Direct returns from planting 14
FARMERS' BULLETIN No. 1406.—GARDEN IRISES:
The appeal of the iris 1
Distribution 1
Survey of botanical types 2
Beardless irises 2
Oncocyclus and Regelia irises 12
Bearded irises 14
Crested irises 22
Bulbous irises 24
Garden uses 27
Landscape uses 31
Propagation 34
Production from seeds 34
Division of the roots 36
Hybridization 38
Irises at flower shows 39
Diseases and insect pests 43
FARMERS' BULLETIN No. 1407.—THE MEXICAN BEAN BEETLE IN THE EAST:
The most destructive insect to growing beans 1
Appearance of insect and nature of damage 1
The insect in its different stages 3
Regions in which this beetle is found 4
Life history and habits 5
Hibernation 6
Food plants 6
Natural agencies of control 7
Control measures 8
Sprays 8
Directions for applying the spray 8
Dusts 9
Applying the dusts 9
Cultural practices favorable for control 11
Summary of control measures 13
FARMERS' BULLETIN No. 1408.—THE HOUSE FLY AND HOW TO SUPPRESS IT:
Kinds of flies found in houses 1
Where the true house fly lays its eggs 2
How the house fly passes the winter 6
Carriage of disease by the house fly 6
Excluding the capturing flies 7
The use of screens 7
Fly papers and poisons 8
Flytraps 8

	Page
FARMERS' BULLETIN No. 1408.—THE HOUSE FLY AND HOW TO SUPPRESS IT—Continued.	Page
Preventing the breeding of flies	9
Construction and care of stables	9
Fly-tight manure pits	9
Frequency with which manure should be removed in cities and towns	10
Health office regulations for control of house flies in cities	10
Disposal of manure in rural and suburban districts	11
Chemical treatment of manure to destroy fly maggots	11
Maggot trap for destruction of fly larvæ from horse manure	13
Compact heaping of manure	14
Garbage disposal and treatment of miscellaneous breeding places	15
Sewage disposal in relation to the prevention of fly-borne diseases	15
What communities can do to eliminate the house fly	16
FARMERS' BULLETIN No. 1409.—TURKEY RAISING:	
The turkey industry of the United States	1
Varieties	2
The Bronze	3
The White Holland	3
The Bourbon Red	4
The Black	4
The Narragansett	4
The Slate	5
Standard weights of turkeys	5
Selecting breeding stock	6
Management of breeding stock	7
Protection from weather	7
Breeding pens or inclosures	7
Feeding the breeding stock	8
Mating	8
Egg production	9
Incubating the eggs	11
Rearing the poults	12
Brooding	12
Development and sex	14
Feeding	15
Fattening for market	16
Marketing	17
Diseases, ailments, and parasites	19
Summary	22
FARMERS' BULLETIN No. 1410.—CONTROL OF BROWN ROT OF PRUNES AND CHERRIES IN THE PACIFIC NORTHWEST:	
Occurrence of brown rot	1
Blossom infection	2
Fruit infection	2
The brown-rot fungus	3
Plowing, cultivation, soils	4
Spraying for prune brown rot	5
Recommendations for control of brown rot of prunes	6
Recommendations for control of brown rot of sweet cherries	7
Preparation of sprays	8
Spraying schedule	12
FARMERS' BULLETIN No. 1411.—CRIMSON CLOVER: SEED PRODUCTION:	
Introduction	3
Seed production for local use	4
Homemade comb strippers for harvesting crimson-clover seed	9
Commercial growing of crimson-clover seed	9
How to grow a good crop of seed	10
Seed-production centers in the United States	10
Troublesome weeds in cromson-clover fields	11
FARMERS' BULLETIN No. 1412.—CARE AND MANAGEMENT OF DAIRY BULLS:	
Importance of proper care	1
Feeding	1
Housing and exercise	3
Stabling	3
Safe-keeper bull pen	4
Fencing	5
Means of exercise	6

FARMERS' BULLETIN NO. 1412—CARE AND MANAGEMENT OF DAIRY BULLS—Continued. Page

Service 9
Keeping records 10
Cost of keep 12
Buying and selling 12
Shipping bulls 13
Cooperative bull associations 14
Handling the bull 15
Ringing 15
Hobbling 16
Throwing or casting 17
Stocks 18
Staff for leading 19
Caution in handling 19
Feet and horns 20
Trimming the feet 20
Dehorning 20
Training horns 21
Trimming and polishing horns 21
Publications relating to dairy cattle 21

FARMERS' BULLETIN NO. 1413.—POULTRY-HOUSE CONSTRUCTION:
Essentials in poultry houses 1
Location and site 1
Types of buildings 2
Yards and fences 2
Size and capacity of houses 3
Cost of building 4
Details of poultry-house design 5
Roof 5
Front and rear 7
Floor 9
Partitions 10
Roosts, dropping boards, and nests 10
Materials for building 11
Constructing the house 11
Framework 11
Floors 14
Walls 15
Roof 16
Estimating materials required 17
Paint and whitewash 19
Plans and bills of materials 21

FARMERS' BULLETIN NO. 1414.—THE ROSETTE DISEASE OF WHEAT AND ITS CONTROL:
Discovery of the rosette disease 1
Economic importance of wheat rosette 1
Geographic distribution 2
Crops affected 2
Symptoms of wheat rosette 2
Symptoms of rosette compared with insect injuries 6
Recurrence 7
Cause 7
Control of wheat rosette 8
Control in the flag-smut area 9

FARMERS' BULLETIN NO. 1415.—BEEF ON THE FARM—SLAUGHTERING, CUTTING, CURING:
Selecting cattle for slaughter 1
Care of cattle before slaughtering 1
Equipment 2
Slaughtering cattle 2
Examining the carcass 14
Cooling the carcass 16
Cutting up the carcass 16
Curing beef 19
Preparing beef products 29
Handling the hide 33
Slaughtering calves 33
Shipping farm meat interstate 33

	Page
FARMERS' BULLETIN No. 1416.—FATTENING BEEF CALVES:	
Marketing beef cattle at an earlier age	1
Comparing the fattening of calves and mature cattle	1
How to procure calves to be fattened as yearlings	2
Type of calves suitable for fattening	3
Breeds suitable for fattening as yearlings	3
Importance of good cows and bulls	3
Management of the farm breeding herd	5
Fall or spring calves	6
Feeding the calf from birth to weaning time	7
Dehorning, castration, and vaccination	8
Equipment and shelter	8
Fedding the calf from weaning time to market	9
Management of calves on pasture	11
Hogs following calves	12
Marketing	12
FARMERS' BULLETIN No. 1417.—IDLE LAND AND COSTLY TIMBER:	
What has become of our timber?	1
Why are lumber prices rising?	1
What has become of our timbered land?	3
Why is idle land a menace?	5
How much timber do we need?	6
How can our timber needs be supplied?	9
How far have we got in timber growing?	10
The outlook for private forestry	14
How can we put timber crops on our idle land?	16
The fire problem	17
The tax problem	17
More public forests needed	18
The public should help tree planting	19
Education and research necessary	19
The need for action urgent	21
FARMERS' BULLETIN No. 1418.—LETTUCE GROWING IN GREENHOUSES:	
Survey of the industry	1
Greenhouses suited to lettuce growing	3
Relation to other forcing crops	4
Intercropping	4
Soil and its preparation	5
Manure, fertilizers, and lime for greenhouse lettuce	6
Varieties and seed	7
Securing lettuce plants	10
Establishing the crop in the greenhouse	13
Care of the crop	14
Harvesting and packing	15
Storage	17
Yields of greenhouse lettuce	17
Diseases affecting greenhouse lettuce	18
Insects injurious to greenhouse lettuce	20
FARMERS' BULLETIN No. 1419.—CARE AND MANAGEMENT OF FARM WORK HORSES:	
Improvement needed in horse husbandry	1
Factors involved in care and management	1
The horseman	2
Stable, shed, and paddock	2
Feeding farm work horses	4
Grooming and clipping	11
The harness, fitting and care	13
Preventing sore shoulders	15
Care of the feet	16
Care of the teeth	17
Hints for the horseman	17

FARMERS' BULLETIN NO. 1420.—HANDLING ROUGH RICE TO PRODUCE HIGH GRADES: Page
The market problem 1
Calsses of rough rice 2
Grades for rough rice 2
Common defects of rough rice 3
Milling difficulties caused by defects 3
Handling to avoid common defects 5
Getting rid of weed seeds, red rice, and other cereal seeds 5
Prevention of damaged kernels, excessive moisture, and foreign materials 10
FARMERS' BULLETIN NO. 1421.—SUCCESSFUL FARMING ON 80-ACRE FARMS IN CENTRAL INDIANA:
Incomes made on 80-acre farms 1
Variations in incomes on 80-acre farms 3
The cropping systems 4
Crop yields 6
Farm layouts 9
What livestock is desirable 11
Livestock production important 11
Labor 16
Work animals 16
Equipment 17
Family living on 80-acre farms 19
Summary 19
Standards of organization and management 20
FARMERS' BULLETIN NO. 1422.—UDDER DISEASES OF DAIRY COWS:
Characteristics of the udder 1
Prevention of diseases and injuries 2
Drying off the cow 2
Separation of cow and calf 3
Vices 3
Diseases and conditions affecting the udder 5
Inflammation of the udder (mammitis, mastitis, garget) 5
Induration, or hardening of the udder 7
Abscess of the udder 8
Gangrene of the udder 8
Tuberculosis of the udder 8
Cowpox 9
Chapped teats 9
Warts 9
Tumors 10
Stricture, or "hard milking" 10
Atresia (blind or imperforate teats) 11
Insect stings 11
Snake bites 12
Wounds or contusions 12
Leaky quarter and fistula 12
Bad flavors and odors of milk 13
Bloody milk 13
Ropy milk 14
Milk stone, or calculus 14
Agalactia, or suppression of milk 15
Milk fever, puerperal fever, or parturient apoplexy 15
FARMERS' BULLETIN NO. 1423.—PREPARATION OF CABBAGE FOR MARKET:
Market types of cabbage 1
Time and methods of harvesting 2
Necessity of careful grading 6
Good containers help to sell 8
Methods of loading cars 10
Handling cabbage for sauerkraut manufacture 12
Methods of storing cabbage 13
Government inspection of cabbage 14

		Page
Farmers' Bulletin No. 1424.—Making Vinegar in the Home and on the Farm:		
	Vinegar	1
	Material used	2
	Fermentation	5
	After treatment	14
	Causes of failure	19
	Darkening of vinegar	21
	Animal parasites	22
	Vinegar bees	23
	Tests	23
	Acid strength of vinegar	26
	Federal regulations governing manufacture and sale of vinegar	28
Farmers' Bulletin No. 1425.—The Tobacco Flea Beetle in the Dark Fire-Cured Tobacco District of Kentucky and Tennessee:		
	Economic importance	1
	Common names and habits	2
	Seasonal history	3
	Food plants	3
	Plant-bed injury	3
	Field injury	4
	Location and protection of the plant bed	5
	Control of the flea beetle in the plant bed	6
	Control on newly set plants	7
	Field control	9
	Summary of control measures for the tobacco flea beetle	11
